Technology Balance in Education

How can we make sure that each student is successful and that our time is spent more effectively?

A Productive Practice site should be the focus of our attention. Educators

should have a meaningful **Problem or Practice**. This something staff genuinely doesn't know how to do and is trying to figure out what's about and get better at.

A rich Problem of Practice:

-
-
-

that we care about

in our classroom or something

about their learning from professional development and early

implementation actions, cover questions

about their learning from professional development and early

implementation actions, cover questions

about their learning from professional development and early

implementation actions, cover questions

about their learning from professional development and early

implementation actions, cover questions
